PRINCIPAL’S MESSAGE

It is with great pleasure that I welcome you to the website of the Wesley Methodist School Melaka.

Wesley Methodist School Melaka is a co–educational school established by the Methodist Church of Malaysia in 1994. It is under the jurisdiction the Council of Education, Methodist Church of Malaysia. The school is strategically located in a quiet, peaceful and safe environment off Jalan Tengkera.

The school offers reasonably priced private education to students who prefer a safe, conducive and stimulating teaching-learning environment. The school environment is ideal to nurture well-rounded and creative students with right values and attitudes towards learning.

The school encourages students to develop soft skills to enable them to interact with one another across gender, ethnic and social boundaries while in school. The cross cultural student population is strength of the school as about 10% of the students are from foreign countries.

The school has a low teacher-student ratio. The number of students in a class does not exceed 20, giving a teacher-student ratio of 1 teacher to 5 students. Small classes ensure personal student attention and optimum academic progress of a student.

Students are given the opportunities to be involved in co-curricular activities that can develop their leadership qualities, boost their confidence, and maximise their innate potentials. Computer assisted teaching-learning and thinking skills pedagogy are part of our strategies to stimulate learning in our students. To monitor students’ academic progress three monthly tests and two term examinations are held for all forms.

English Language Proficiency

An English-speaking environment in the school further enhances students’ fluency in English. English is used as the language for communication in the school.

The school aims at maintaining a high standard of proficiency in both written and spoken English. Beginning from 2014, three extra subjects i.e. IGCSE Mathematics, Science and English are taught to Form 1 students to further enhance English proficiency.

Mathematics and Science for PT3 and SPM students are taught in English.

Computer Literacy
The school prides itself on its ability to provide computer literacy classes for all its students from Form 1 to Form 3. The students are taught essential computer skills, Microsoft Office software and other Internet applications.

**Christian Heritage**

To preserve our Christian Heritage, we have chapel services and Bible Knowledge classes. At the same time, respect for each other's religion and freedom of worship are upheld in the school.

**Our Commitment**

The teachers are committed to help students realise their God given talents and potentials. The school believes that the teachers complement the parents in the responsibility and task of nurturing, training and building of good ethical behaviour and responsible citizenship.
